----	-----	-----	-----

It is encouraging to report that the summer mohair season of 2025 has started positively.

Except for three bales with reserves, all the mohair on offer was sold at an average price indicator 4.8% better than the last sale in December. We are still 5% short compared to a year ago, but the Rand was also 3% weaker against the US Dollar a year ago. The best news is that the best demand was for the specific micron groups that were the most neglected in the past six months. The 28-to-31-micron group improved between 5% and 8%. The HF catalogue had an extremely limited offering on the sale of quality fine kids. The exception was the bale of Wimpie Schoeman (Wildealslaagte Boerdery) of Willowmore. This B-length, good style, 23.7-micron bale of summer kids, with a clean yield of 86%, sold for R675.10/kg. Congratulations Wimpie! The next sale will have better quality mohair on, but the sale will be substantially bigger. The sale will be held on the 4th of March 2025 at the International Mohair Exchange.
